

An LMS-Integrated AI Tutor Built for Institutional Control

A course-aware AI tutor built to help institutions scale academic support inside the LMS

What is StudyBuddy?

StudyBuddy is a course-aware AI tutor that integrates directly into the LMS to help colleges and universities deliver scalable academic support.

Grounded in approved course materials, it guides students toward understanding while giving academic teams the oversight, visibility, and control generic AI tools do not provide.

How It Works

LMS Integration

Lives within Canvas, Blackboard, D2L, Moodle, and other platforms.

Socratic Tutoring

Guides students with probing questions that deepen understanding.

Course-Aware

Aligns answers to your curriculum and materials.

Controlled Web Lookups

When web data is used it's cited inline.

Voice-Enabled & Multilingual

Supports spoken input/output and languages like English & Spanish.

What Students Experience

- ✓ Instant support inside the LMS and within course context
- ✓ Guidance grounded in course materials, not generic AI output
- ✓ A Socratic tutoring experience that promotes understanding over copy-paste behavior
- ✓ More accessible support across learning styles, languages, and formats

Empowering Institutions

For academic teams and student success units:

Identify At-Risk Students Early with analytics

Track Usage & Trends through reporting portals

Monitor Conversations & Feedback to improve support quality

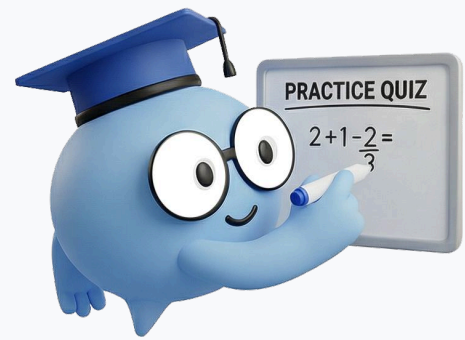

Manage Academic Quality with curriculum alignment and transparency

Why It Matters

Traditional tutoring doesn't scale, students study at all hours and often get stuck without support. Generic AI tools can spit out ungrounded answers.

StudyBuddy instead teaches understanding, helping students think critically and improving learning outcomes, at scale, within your systems.
