

Course-Aware AI Tutor Inside the LMS

StudyBuddy helps colleges and universities deliver scalable academic support inside the LMS, grounded in course materials and guided by socratic tutoring, with oversight for academic teams.

What StudyBuddy Is

StudyBuddy is an AI-powered academic tutor for higher education.

It works inside the LMS, draws from approved course materials and faculty-managed knowledge, and guides students through course concepts using Socratic tutoring.

How StudyBuddy Works

Governed AI tutoring inside the LMS

LMS Integration

Runs inside the LMS with enrollment-based access.

Course-Aware Support

Uses course materials and faculty-managed knowledge.

Socratic Tutoring

Builds comprehension, critical thinking, and independent learning.

Controlled Web Search

Supports controlled search with cited sources.

Voice + Language Support

Supports voice, English, Spanish, and configured languages.

Citations & Sources

Uses whitelisted references for source transparency.

Student Learning Experience

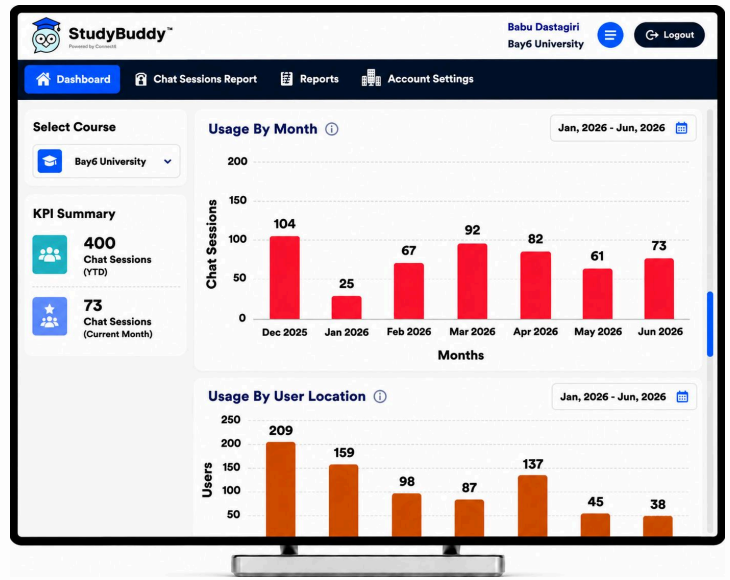

Curriculum-Aligned Support

-  Instant, course-aware tutor support inside the LMS
-  Mobile browser-friendly access for learning anytime
-  Personalized responses based on student progress context
-  Student feedback on answers to improve support quality

Academic Visibility & Controls

Oversight for teams and faculty

-  Reporting portal to review usage and engagement
-  Track usage patterns and engagement trends
-  Monitor answered and unanswered questions
-  Access conversation transcripts for quality review
-  Review student feedback to improve support quality

Why It Matters

Academic support cannot depend only on fixed schedules.

StudyBuddy brings AI-assisted tutoring into the LMS, grounded in course materials and visible to academic teams, helping institutions support students within a governed learning environment.

Security, Privacy & Compliance

Built for procurement-friendly review

Access Control

Governed by enrollment & role-based permissions

Data Handling

Designed to align with FERPA requirements

Auditability

Transparent through transcripts, logs, and admin reports

Compliance

SOC 2 Type II certified and FERPA compliant

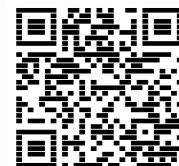

LMS-Integrated Deployment

StudyBuddy brings AI-assisted academic support into the LMS, with course access controls, secure student information sync, and course-material ingestion built into the deployment.
